TARUKA ECO

Manufacturer and Exporter of Biodegradable Tableware

ABOUT THE COMPANY

Our headquarter is in the central part of India, a city named Ujjain and our Branch office is in Delhi NCR. We are established as a manufacturer and exporter of biodegradable tableware and we also have 4 years plus experience with different brands and companies. TARUKA ECO products LLP offers eco-friendly customized solutions for food serving and food packaging with takeaway products solutions. We are providing healthy, non-chemical, light-weighted, cost-effective and of course natural products for the daily requirements of HORECA industries as well as households. These products are easily compostable and biodegradable in the soil without any energy loss. In our products served food is as natural as cooked.

As these products are easily compostable and biodegradable in the soil without any energy loss. In our products, food is served as just as natural as you cooked. With State of the art manufacturing facility and an In-house raw materials processing unit. The aim to provide premium quality products and good deliverables. TARUKA maintains International quality standards for export as well as domestic market.

We are on the mission of reducing plastic and would love you to Join Us.

ARECA LEAF

ARECA LEAF PRODUCTS

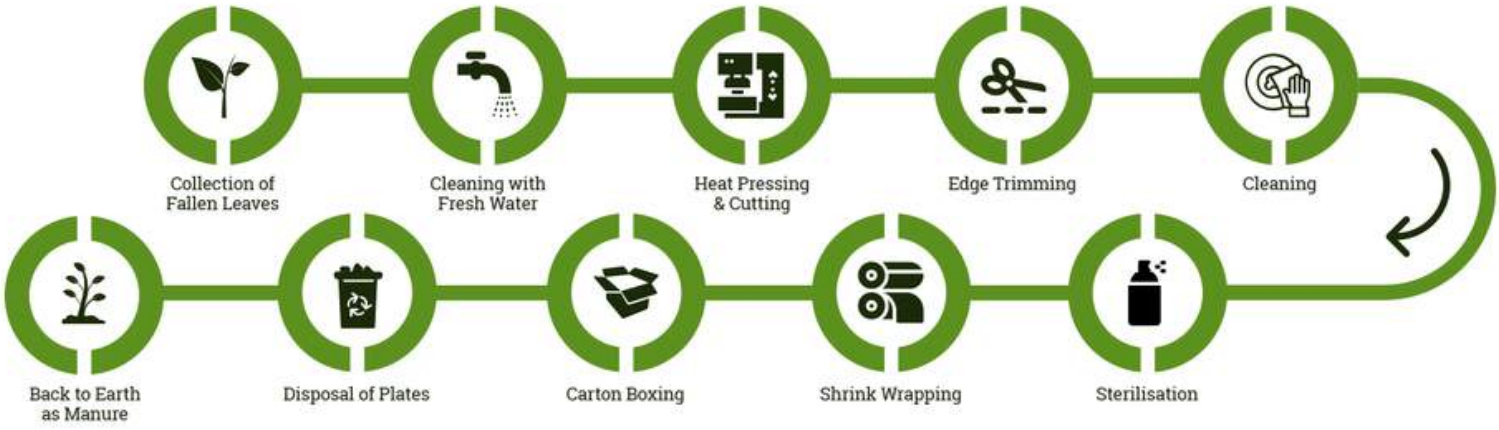

The areca leaf products are good biodegradable natural products. In the Coastal areas Of India, the areca leaf is abundantly available due to widespread areca cultivation. The procured leaves are washed, soaked, molded, and baked using a simple leaf plate-making machine. Currently, these plates are used mostly in traditional, religious, auspicious occasions and in ceremonial functions and festivals. Different types of moulds (of various forms) like square, round, oval, and rectangle can be used to give the required kind of shape to the plate. After using areca products can be given to animals (cow and buffalo) to eat.

SUGAR CANE BAGASSE

FOOD SERVING AND TAKEAWAY SOLUTIONS

SUGAR CANE BAGASSE PRODUCTS

Bagasse is burned as fuel in the sugarcane mill or used as a source of cellulose for manufacturing animal feeds. Paper is produced from bagasse in several Latin American countries, in the Middle East, and in sugar-producing countries that are deficient in forest resources.

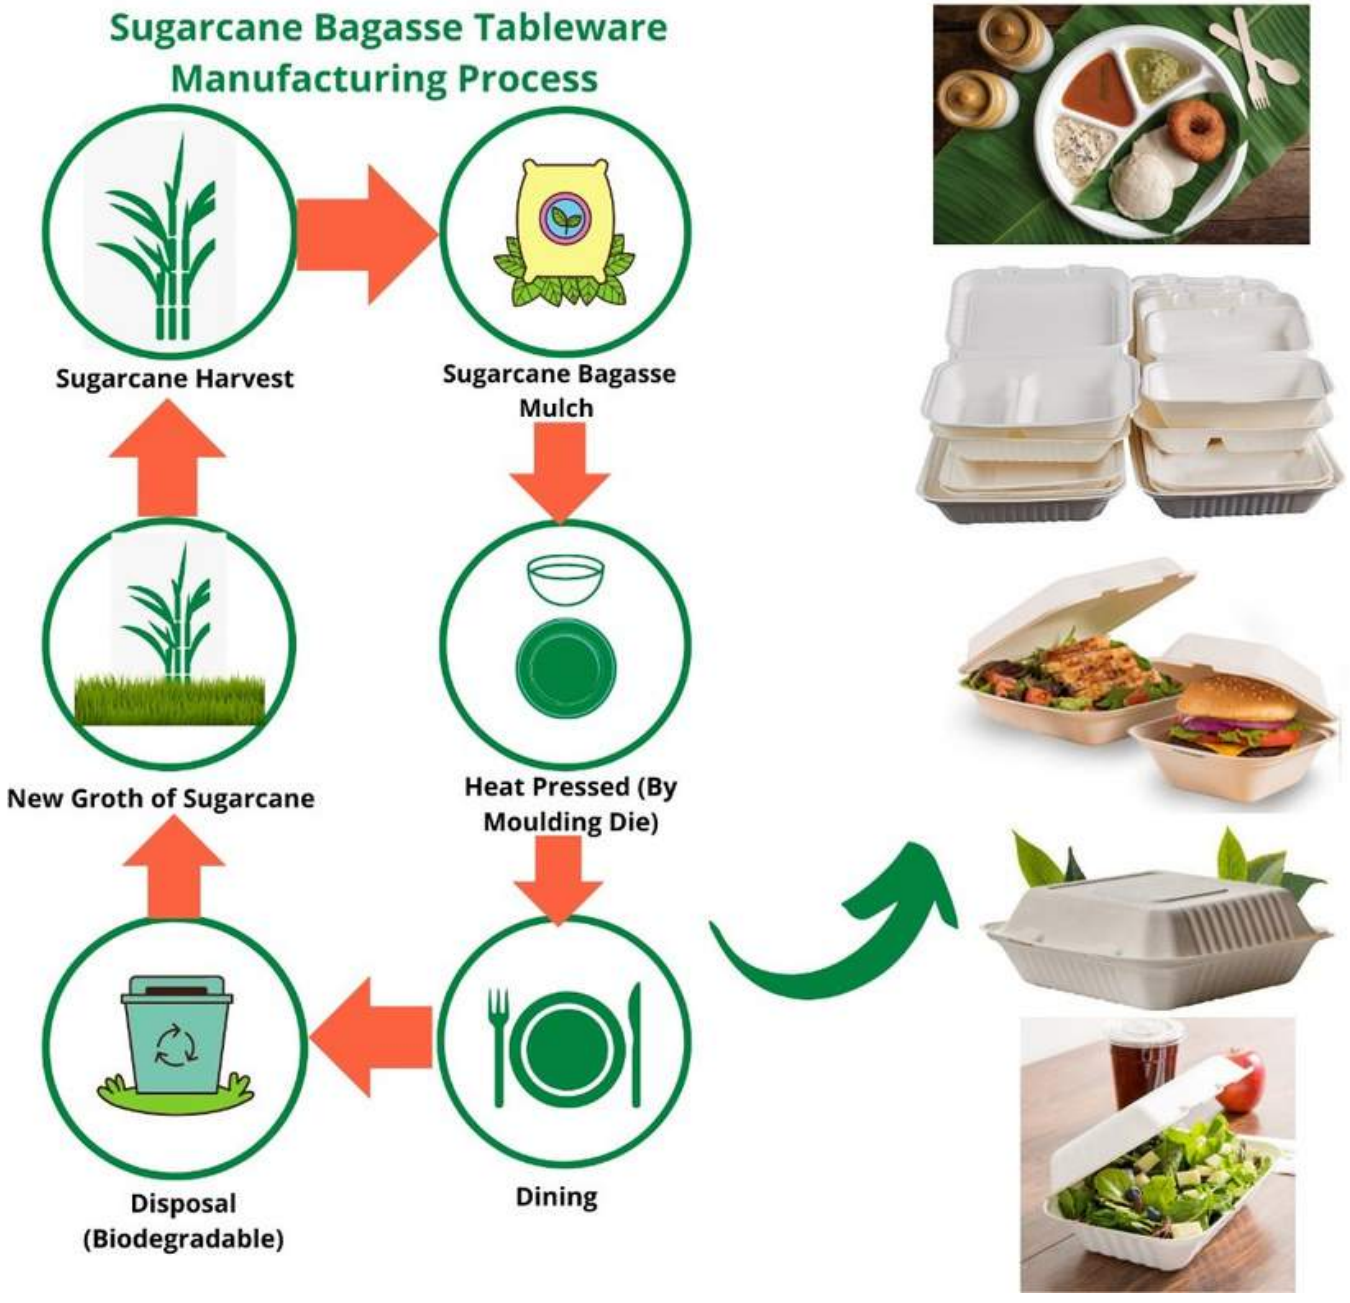

By utilizing the waste from the fibrous stalks from sugarcane, bagasse can be used to create products ranging from tableware and food serving items to food containers, paper products and more.

PAPER FOOD TAKEAWAY CONTAINERS (KRAFT)

PAPER FOOD CONATINERS (KRAFT)

Paper food containers are a sustainable packaging choice for takeaway food. Our extensive food container range provides the market with versatile packaging solutions for a wide range of takeaway foods such as salads, soups, noodles, pasta etc.

Paper containers are essential supplies for every food service establishment. Paper containers are manufactured from high GSM paper with Water soluble Eco coating, or PE coating inside, making the paper containers ideal for deliveries.
Paper food containers comes with a lid. The lid fits the containers properly. The paper container is suitable to pack and deliver starters, and curries to the customer.

HOW MANUFACTURED:-

Paper containers are manufactured using virgin paperboard to guarantee food safety.
Manufacturing is very much similar to the paper cup manufacturing process.
1. The paper roll is printed and cut into carefully measured sidewall blanks
2. The banks are inserted into the round container-forming machine that wraps the blanks into the cup shape, adds the bottom, and heats the edges to create the cup.
3. Then the machine trims the cup rim, and the paper container is ejected from the machine and is ready to be packed.

FEATURES :-

1. **Eco-Friendly Material (Paper Pulp)**
2. **Biodegradable and compostable**
3. **Grease and oil resistance**
4. **Heat resistance**
5. **Microwavable**
6. **Customizable**
7. **Sturdiness**
8. **Environmental friendliness**
9. **Versatility & Recyclable**

RAW BAMBOO PRODUCTS

RAW BAMBOO PRODUCTS

Strength and durability are two key parameters for household and building products. Bamboo-based fiber composites, such as bamboo scriber, have been developed in recent years. Bamboo scriber, a new generation of bamboo products with high strength, which is formed by changing the bamboo cell structure under the dual actions of high pressure and resin, has emerged as another noticeable bamboo product. TARUKA provides you with the best range of bamboo water bottles, bamboo toothbrushes. chopsticks & bamboo straws with effective & timely delivery.

PAPER RIPPLE CUPS

Paper ripple cups, also known as ripple-walled cups or insulated paper cups, are popular disposable cups used for serving hot beverages like coffee, tea, or hot chocolate. These cups are designed with a unique ripple or corrugated texture on the outside, which provides several features and benefits.

The primary feature of ripple cups is their insulation capability. The ripple design creates an air gap between the outer and inner layers of the cup, which helps to trap heat and keep the beverage hot for a longer period. This insulation also prevents the outer surface of the cup from becoming too hot to hold.

FEATURES :-

- Enhanced grip
- Comfortable drinking experience
- Customizability
- Heat resistance
- Environmentally friendly
- Versatility
